# Sample configuration file for the Samba suite for Debian GNU/Linux.  
#  
# This is the main Samba configuration file. You should read the  
# smb.conf(5) manual page in order to understand the options listed  
# here. Samba has a huge number of configurable options most of which  
# are not shown in this example  
#  
# Some options that are often worth tuning have been included as  
# commented-out examples in this file.  
# - When such options are commented with ";", the proposed setting  
# differs from the default Samba behaviour  
# - When commented with "#", the proposed setting is the default  
# behaviour of Samba but the option is considered important
